

Press selection guide

All presses come with accessories and electrical controls ready to plug in and use.
Special tools and nozzles are supplied. All presses are variable speed.

Throughput is based on canola and similar crops

<p><u>OIL PRINCE</u> 30lbs/hr</p> <p>single or 3 phase 3HP</p>		<p>Low cost and lighter weight commercial press. Good business start-up press. Same barrel and screw as KK20 and KK40. Cake in pellet form.</p>
<p><u>KK20</u> 40lbs/hr</p> <p>single or 3 phase 3 or 4 HP</p>		<p>Industrial machine capable of running 24/7 for months on end. Strong gearbox for long life. Can press a wide variety of seeds and large nuts. Cake in pellet form. Very low seed pulp content in oil. Available as KK20S with larger drive and special press cylinder for hard low oil seeds.</p>
<p><u>KK40</u> 80lbs/hr</p> <p>single or 3 phase 4 or 5.5HP</p>		<p>Same robust features as above KK20 but with 2 barrels to give twice the capacity. This is the most popular on-farm press giving good output and high efficiency. Capacity can be increased in stages by adding more of these compact units. Available as KK40S for hard low oil seeds.</p>
<p><u>KK80</u> 170lbs/hr</p> <p>3 phase 7.5HP motor</p>		<p>Industrial machine can be run continuously. Excellent for medium to high oil content soft seeds. Cake in flake form or coarse meal.</p>
<p><u>KK100</u> 170lbs/hr <u>KK100HD</u> 300lbs/hr</p> <p>3 phase 10HP motor 12 HP motor</p>		<p>Industrial machine can be run continuously. Excellent for medium to low oil content hard seeds. Cake in flake form or coarse meal.</p>
<p><u>KK500</u> 1000lbs/hr</p> <p>3 phase 25HP motor</p>		<p>Large throughput machines available. Segmented screw can be configured for a wide variety of seeds</p>
