

Press selection guide

All presses come with accessories and electrical controls ready to plug in and use.
All (except kitchen press) are variable speed.

KITCHEN PRESS 1kg/hr

single phase

Ideal for home use, demonstrations or small samples. Small seeds only e.g. rapeseed, linseed etc. Easy to clean. Not suitable for continuous running.

Price £300

KK8 8kg/hr

single or 3 phase

Industrial machine with small throughput. Good for producing larger samples and suitable for continuous running 24/7. Can not press large seeds and nuts. Cake in pellet form.

Price £3,150

OIL PRINCE 15kg/hr

single or 3 phase

Low cost press, ideal for production of a few hundred litres per week. Same barrel and screw as KK20 and KK40. Can press larger seeds. Cake in pellet form.

Price £3,200

KK20 20kg/hr

single or 3 phase

Industrial machine capable of running 24/7 for months on end. Strong gearbox for long life. Can press a wide variety of seeds and nuts. Cake in pellet form. Very low seed pulp content in oil.

Price £4,150

KK40 40kg/hr

single or 3 phase

Same robust features as above KK20 but with 2 barrels to give twice the capacity. This is the most popular on-farm press giving good output and high efficiency. Capacity can be increased in stages by adding more of these compact units.

Price £5,300

KK80 80kg/hr

3 phase
5kW motor

Industrial machine can be run continuously. Modern screw design gives low solids in oil compared with other bar type presses on the market. Excellent for 'difficult' seeds such as chia and linseed. Cake in flake form.

Price £10,800

KK500 500kg/hr

3 phase
18kW motor

Large throughput machines available in 200kg/hr, 500kg/hr and 1000kg/hr. More information available on request.

Price ~£50,000
