EQUIPMENT FOR APPLYING LABELS TO BOTTLES AND OTHER CONTAINERS

Manual labeller

Hand operated label applicator. Place the bottle on the rollers and turn the handle to apply self adhesive labels from a roll. Easily adjustable for a wide range of bottle and label sizes including full wrap-around and front-and-back off the same roll. Simple to use but well engineered and robust.

- Max. label height 175mm, bottle diameters 50 to 250mm.
- Speed 300 to 500 bottles per hour

Guide price £550 plus VAT

Electric labeller

Quick and easy - place the bottle on the rollers and press the foot pedal.

- Model available to apply front and back labels at the same time with variable spacing.
- Can accommodate a wide range of round containers from small diameter bottles to large jars.
- Solid machine with robust steel frame
- Up to 1000 bottles per hour

Single label model, guide price: £1,150 +VAT

Front and back model, guide price: £1,324+VAT

Semi-automatic labeller

Industrial machine. Place the bottle on the rollers and label is automatically applied from a roll. Easily adjustable for a wide range of bottle and label sizes including full wrap-around and front-and-back off the same roll.

- Date stamp option
- Options for tall labels
- Front and back options
- Square bottle option
- Speed up to 2000 bottles per hour

*Price from £2,200 to ~ £3,900 +VAT
depending on options*

Label Dispenser

This machine peels the backing from label roll and presents the label for manual application. Removal of the label results in the next one being automatically presented. Removes the fiddly operation of manually peeling labels from the backing paper. The label can then be lifted off and applied by hand or the container to be labelled can be positioned under the presented label edge, the label edge is then pressed onto the container (thereby ensuring it is straight) and then wiped around by hand.

Guide price £590 + VAT
